

Tema 1.- Inteligencia Artificial

Álvaro S. Castaño Garrido

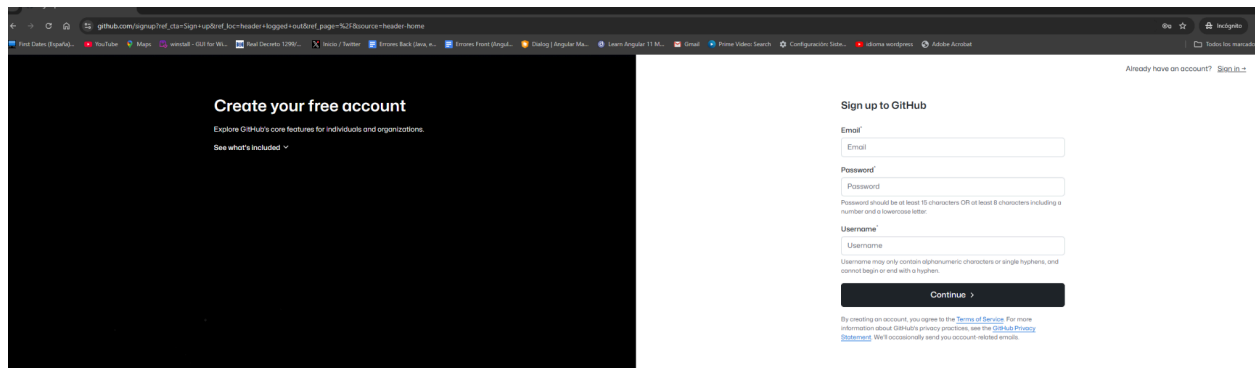

Paso 1.-

Ir a la página de GitHub y pulsar arriba a la derecha en sign In

Paso 2.-

Rellenar los campos

Paso 3.-

Pulsar el boton de new para crear el repositorio

The screenshot shows the GitHub dashboard for the user 'ascastanog'. The left sidebar contains the user's profile, a 'New' button, and lists of 'Top repositories' and 'Your teams'. The main content area displays a notification about being added to the 'iescastelar' organization, a search bar for Copilot, and a 'Home' section with trending repositories like 'unclecode/craw4ai' and 'khoj-ai/khoj'.

Create a new repository

A repository contains all project files, including the revision history. Already have a project repository elsewhere? [Import a repository.](#)

Required fields are marked with an asterisk ().*

Owner *

Choose an owner ▾

Repository name *

/

Great repository names are short and memorable. Need inspiration? How about **special-barnacle** ?

Description (optional)

 Please choose an owner to see the available visibility options.

Initialize this repository with:

☐ Add a README file

This is where you can write a long description for your project. [Learn more about READMEs.](#)

Add .gitignore

.gitignore template: None ▾

Choose which files not to track from a list of templates. [Learn more about ignoring files.](#)

Choose a license

License: None ▾

A license tells others what they can and can't do with your code. [Learn more about licenses.](#)
